Table 1. Mean normalized gain across task streams. Each benchmark–backbone combination; higher is better. ReHarness is best or tied in 9 of 10 columns.

	CL-Bench			MemoryBench			MemoryArena			All
Method	**Claude**	**GPT**	**Gemini**	**Claude**	**GPT**	**Gemini**	**Claude**	**GPT**	**Gemini**	**Avg.**
Mem0	0.103	0.220	0.092	0.049	0.016	0.053	0.093	0.322	0.235	0.131

ReHarness	**0.217**	**0.317**	0.233	**0.160**	**0.096**	**0.064**	**0.305**	**0.358**	**0.408**	**0.240**
Δ vs. best baseline	+0.026	+0.018	−0.001	+0.022	+0.032	+0.011	+0.160	0.000	+0.117	+0.072

Δ vs. best baseline is ReHarness minus the strongest of the seven baselines in that column (green: ahead, grey: tied, red: behind); derived here, not in the paper. Bold: best and underline: second best in each column (ties share the mark). Shaded: ReHarness.
